

CITY LIGHTS

City lights / Summer raindrops / Reminisce underneath the purple sky
When you're near / A fire turns on / Suddenly the radio plays our song
It's magic / Magnetic / Chemical love with you

Oh, oh I just wanna love / I just wanna love you tonight
Oh, oh I just wanna love / I just wanna love you tonight
Tonight

City lights / Close to heaven / I'm alive but I need you to be near me
When you're near / I feel the tension / On your lips and fingertips all night long

And I can't, can't give away / I can't deny
You elevate, take me / Don't you know, don't you know
We're star crossed lovers?
Go on, this is how I lose control
You resonate, touch me / I belong, I belong
To this love
